

New System Architecture

Utility Company

The Abtech team worked with a **South-Central regional Utility company** to plan out a completely **new infrastructure for an Oracle application, upgrade their Exchange server and Storage systems**, and make future server and storage recommendations. Abtech engineers completed all projects successfully and on time.

Major Parking Lot Architecture Company

A **major parking lot architectural company with five major distribution centers** in the United States approached Abtech to design and implement a new **IT infrastructure** to run their primary Oracle application. This client has worked with Abtech for several years and has recently referred us to two new clients who needed **new Oracle environments**. One of those clients has become an **Abtech managed services** customer and uses our **StorTrust Cloud Disaster Recovery service** to protect their critical IT systems.
