

## Anti-Malware Software Replacement

### Abtech Technologies Client Base

Due to a growing concern in **digital security, especially Ransomware protection**, we decided to migrate Abtech's customers from **ESET to SonicWALL Capture Client**. Capture client integrates multiple protection layers, including **Sentinel One Capture ADP**, and utilizes next-gen machine learning techniques. It also centralizes management since the clients already utilize SonicWALL Firewalls to protect their network.

### Architectural Group

An architectural group had growing concerns with proper digital security, especially Ransomware protection. Abtech decided to migrate this customer from **ESET to SonicWALL Capture Client**. They are now afforded a greater degree of protection on many levels and a combined centralized management system.
